DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3,5,7,9 and 11 rejected under 35 U.S.C. 102(b) as being anticipated by Smitley (5,411,002).

Smitley discloses a method for controlling fuel pressure for a fuel injected engine, comprising the steps of: providing a fuel pump (14) with an inlet port which is connectable in fluid communication with a fuel supply and an outlet port which is connectable in fluid communication with a fuel injector (20); measuring (24) a fuel pressure at a location which is in fluid communication with said outlet port; and controlling an operating speed of said fuel pump as a function of said fuel pressure measured at said location which is in fluid communication with said outlet port (columns 5 and 6, lines 63-68 and 1-14 respectively).

With regard to claim 3, the controlling step comprises the step of transmitting a pulse width modulated signal to said fuel pump.

With regard to claims 5,7,9 and 11, see above and figure 1.

Allowable Subject Matter

3. Claims 2,4,5,8,10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show fuel pump control systems.
